HIGH PERFORMANCE BRAKE PADS

CATALOGO 2014

Auto e Veicoli Commerciali

Le pastiglie Roesch Brake XC4 - 900° - sono adatte all'uso stradale, ai track day e a tutte quelle vetture che soffrono sul frenante.

Le XC4 lavorano a temperature inferiori del 30% rispetto alle temperature tradizionali, si evitano così problemi di distorsione, di consumo irregolare dei dischi e surriscaldamento dell'impianto e relativo vapor-lock.

La nostra pastiglia è perfetta per tutti i tipi di vettura, dalla piccola auto da città, le grosse berline, le monovolume, SUV, SAV, supersportive e veicoli commerciali.

È stata studiata e creata per l'esclusivo impiego stradale, nonostante il suo coefficiente di attrito, circa 0,45, riesce a mantenere il massimo comfort quale silenziosità, aumento del chilometraggio e immediata risposta senza preriscaldamento ma soprattutto riduzione degli spazi di frenata a confronto di un normale materiale.

La caratteristica principale che contraddistingue questo prodotto riguarda la grande modulabilità della frenata per un controllo perfetto e costante nella decelerazione del veicolo dovuto principalmente dalla stabilità del coefficiente d'attrito e da un attacco iniziale molto dolce che evita che si sposti d'impeto circa il 70% del peso della vettura tutto sull'asse anteriore della vettura, ma che si distribuisca equamente su entrambi.

Queste pastiglie non si bruciano o vetrificano e i tempi di rodaggio sono minimi.

Sagome

Le sagome delle pastiglie possono essere richieste all'indirizzo email info@roeschbrake.com

Rodaggio consigliato XC4

Il rodaggio delle XC-4 viene chiamato in gergo SCORCHING e normalmente viene fatto sulle pastiglie da competizione.

- Bisogna far adattare per pochi chilometri il disco freno e la pastiglia.
- Procedere con frenate molto lunghe in modo da "scottare" le pastiglie;

In questo modo si fa fuoriuscire la resina e i materiali si stabilizzano (possibile denso fumo e forte odore).

Fare molta attenzione durante questo passaggio poiché quando esce la resina si ha un crollo di coefficiente di frenata.

- Mantenersi ancora a basse velocità per raffreddare le pastiglie facendo alcune frenate per pulire la superficie delle stesse.

A questo punto si può rifare lo stesso trattamento (sempre con cautela) ma sicuramente le pastiglie saranno stabilizzate e pronte ad ogni uso!

Dopo poche centinaia di km le pastiglie daranno il meglio.

ZP Roesch Brake non risponde della sicurezza e del modo in cui viene effettuato il rodaggio.

Le pastiglie Roesch Brake XC4 - 900° - sono adatte all'uso stradale per i veicoli commerciali sia per carico merci che per trasporto persone, che notoriamente soffrono sul frenante. Le XC4 lavorano a temperature inferiori del 30% rispetto alle tradizionali, si evitano così problemi di distorsione, di consumo irregolare dei dischi e surriscaldamento dell'impianto e relativo vapor-lock.

La nostra pastiglia è perfetta per tutti i tipi di veicoli commerciali oltre che auto da città, grosse berline e le monovolume fino ad arrivare ai SUV, SAV e supersportive. È stata studiata e creata per l'esclusivo impiego stradale, nonostante il suo coefficiente di attrito, circa 0,45, riesce a mantenere il massimo comfort quale silenziosità, aumento del chilometraggio e immediata risposta senza preriscaldamento ma soprattutto riduzione degli spazi di frenata a confronto di un normale materiale.

La caratteristica principale che contraddistingue questo prodotto riguarda la grande modulabilità della frenata per un controllo perfetto e costante nella decelerazione del veicolo dovuto principalmente dalla stabilità del coefficiente d'attrito e da un attacco iniziale molto dolce che evita che si sposti d'impeto circa il 70% del peso della vettura tutto sull'asse anteriore della vettura, ma che si distribuisca equamente su entrambi.

Queste pastiglie non si bruciano o vetrificano e i tempi di rodaggio sono minimi.

Tutte le pastiglie Roesch XC-4 sono omologate per uso stradale a livello europeo.

Sagome

Le sagome delle pastiglie possono essere richieste all'indirizzo email info@roeschbrake.com

Rodaggio consigliato XC4

Il rodaggio delle XC-4 viene chiamato in gergo SCORCHING e normalmente viene fatto sulle pastiglie da competizione.

- Bisogna far adattare per pochi chilometri il disco freno e la pastiglia
- Procedere con frenate molto lunghe in modo da "scottare" le pastiglie;

In questo modo si fa fuoriuscire la resina e i materiali si stabilizzano (possibile denso fumo e forte odore).

Fare molta attenzione durante questo passaggio poiché quando esce la resina si ha un crollo di coefficiente di frenata.

- Mantenersi ancora a basse velocità per raffreddare le pastiglie facendo alcune frenate per pulire la superficie delle stesse.

A questo punto si può rifare lo stesso trattamento (sempre con cautela) ma sicuramente le pastiglie saranno stabilizzate e pronte ad ogni uso!

Dopo poche centinaia di km le pastiglie daranno il meglio.

ZP Roesch Brake non risponde della sicurezza e del modo in cui viene effettuato il rodaggio.

I dischi della Roesch Brake - Linea BF - sono baffati e forati e vengono prodotti con una particolare lega con un alto coefficiente di attrito. Sono i dischi ideali per un upgrade tecnico migliorativo e sono indicati per qualsiasi vettura o veicolo commerciale in quanto aumentano e garantiscono le prestazioni di una vettura di serie. Ogni pista frenante ha un suo specifico disegno; i fori consentono l'eliminazione dei gas di fading e delle polveri generate durante la frenata, mentre le baffature mantengono le pastiglie freno sempre efficienti migliorando così la costanza e l'uniformità della frenata. Su richiesta la Roesch Brake produce anchei dischi solo forati e ove possibile anche nel formato componibile (2 Pezzi) con campana in Ergal e pista frenante ad alte prestazioni. I dischi componibili Roesch - Linea CX - garantiscono un upgrade ancora superiore rispetto ai dischi tradizionali e, mantenendo le dimensioni dei dischi originali, non impongono nessuna modifica alle pinze e a tutto il sistema frenante. Ma Roesch non si ferma qui.. Su richiesta realizza anche altre applicazioni per le auto ed i veicoli commerciali non presenti sul nostro catalogo.
